

In the Specification

As seen from the previously filed redline copy Corrected Substitute Specification filed with the RCE, there was no new matter added, Applicant merely reorganized the material for better readability. Further revisions were made to correct grammatical and typographical errors.

According to the Examiners comments, "The added material which is not supported by the original disclosure is as follows: pages 47-49 of the original specification have been deleted". However, the paragraphs on those referenced pages were relocated to pages 2-4 of the specification.
